OPDRACHT 2

OPDRACHT 3

The screenshot displays the jQuery UI website on the left and a code editor on the right. The website shows the 'Accordion' widget documentation, including its description, examples, and a list of interactions and widgets. The code editor shows the HTML markup for the accordion, which includes a container with four sections. Each section has a header and a content area. The CSS in the editor defines the visual styling, including the default appearance of the headers and the content areas, as well as the behavior of the accordion (e.g., expanding/collapsing sections).

jQuery UI Accordion

Displays collapsible content panels for presenting information in a limited amount of space.

Interactions

- Draggable
- Dropable
- Resizable
- Selectable
- Sortable

Widgets

- Accordion
- Autocomplete
- Button
- Checkboxradio
- Controlgroup
- Datapicker
- Dialog
- Menu
- Progressbar
- Selectmenu
- Slider
- Spinner
- Tab
- Tooltip

Examples

- Default functionality
- Collapse content
- Customize icons
- Fill space
- No auto height
- Sortable

HTML Markup

```
<div class="ui-accordion">
  <h3>Section 1</h3>
  <div>
    <p>Content for Section 1</p>
  </div>
  <h3>Section 2</h3>
  <div>
    <p>Content for Section 2</p>
  </div>
  <h3>Section 3</h3>
  <div>
    <p>Content for Section 3</p>
  </div>
  <h3>Section 4</h3>
  <div>
    <p>Content for Section 4</p>
  </div>
</div>
```

CSS

```

.ui-accordion {
  width: 100%;
  border: 1px solid #ccc;
  padding: 5px;
}
.ui-accordion .ui-accordion-header {
  padding: 5px;
  border: 1px solid #ccc;
  border-bottom: none;
}
.ui-accordion .ui-accordion-content {
  padding: 5px;
  border: 1px solid #ccc;
  border-top: none;
}

```
